

REF 69-0235

IPC- Standards & Codes

28 April 1969

Mr. H. R. J. Grosch, Director
Center for Computer Sciences
and Technology
National Bureau of Standards
Washington, D. C. 20234

Dear Mr. Brosch:

We have reviewed document X3.2/771 (attachment to your Memorandum dated 10 March 1969) which describes the proposed revision to USA Standard X3.26-1969, the USA Standard Hollerith Punched Card Code. The Central Intelligence Agency recommends that the National Bureau of Standards vote for this revision which extends the code from a 128 byte to a 256 byte set and which updates the standard for compatibility with 8-bit byte machines.

STATINTL

Sincerely,

Chief, Information Processing Staff
